Validation by France fishing industry and the European Fisheries Fund (Janvier/Février 2019)

Project Development:

Research / Development, Manufacture /  
Installation of Sailing,

Compilation of Consumption Data and  
Meteorology,

Analysis and optimization,

Promotion of the project,

Back to funding bodies,

# FINANCEMENT

## Budget:

- 100 000€ Hydraulique/Compilation des données
- 300 000€ Matériel (Voile)
- 100 000€ Etude (Architecture navale)
- 30 000€ Administratif

Financement: 50% FEAMP 50% FFP

# RESULT

- For the moment the only result is the deposit of the project,
- The expected results are:
  - The reduction of fuel consumption from 10 to 40% of each equipped boat,
  - An improvement of 10 to 40% of the profitability of each equipped fishing company,
  - An improvement of fish stocks exploited by these companies from 10 to 40%.
